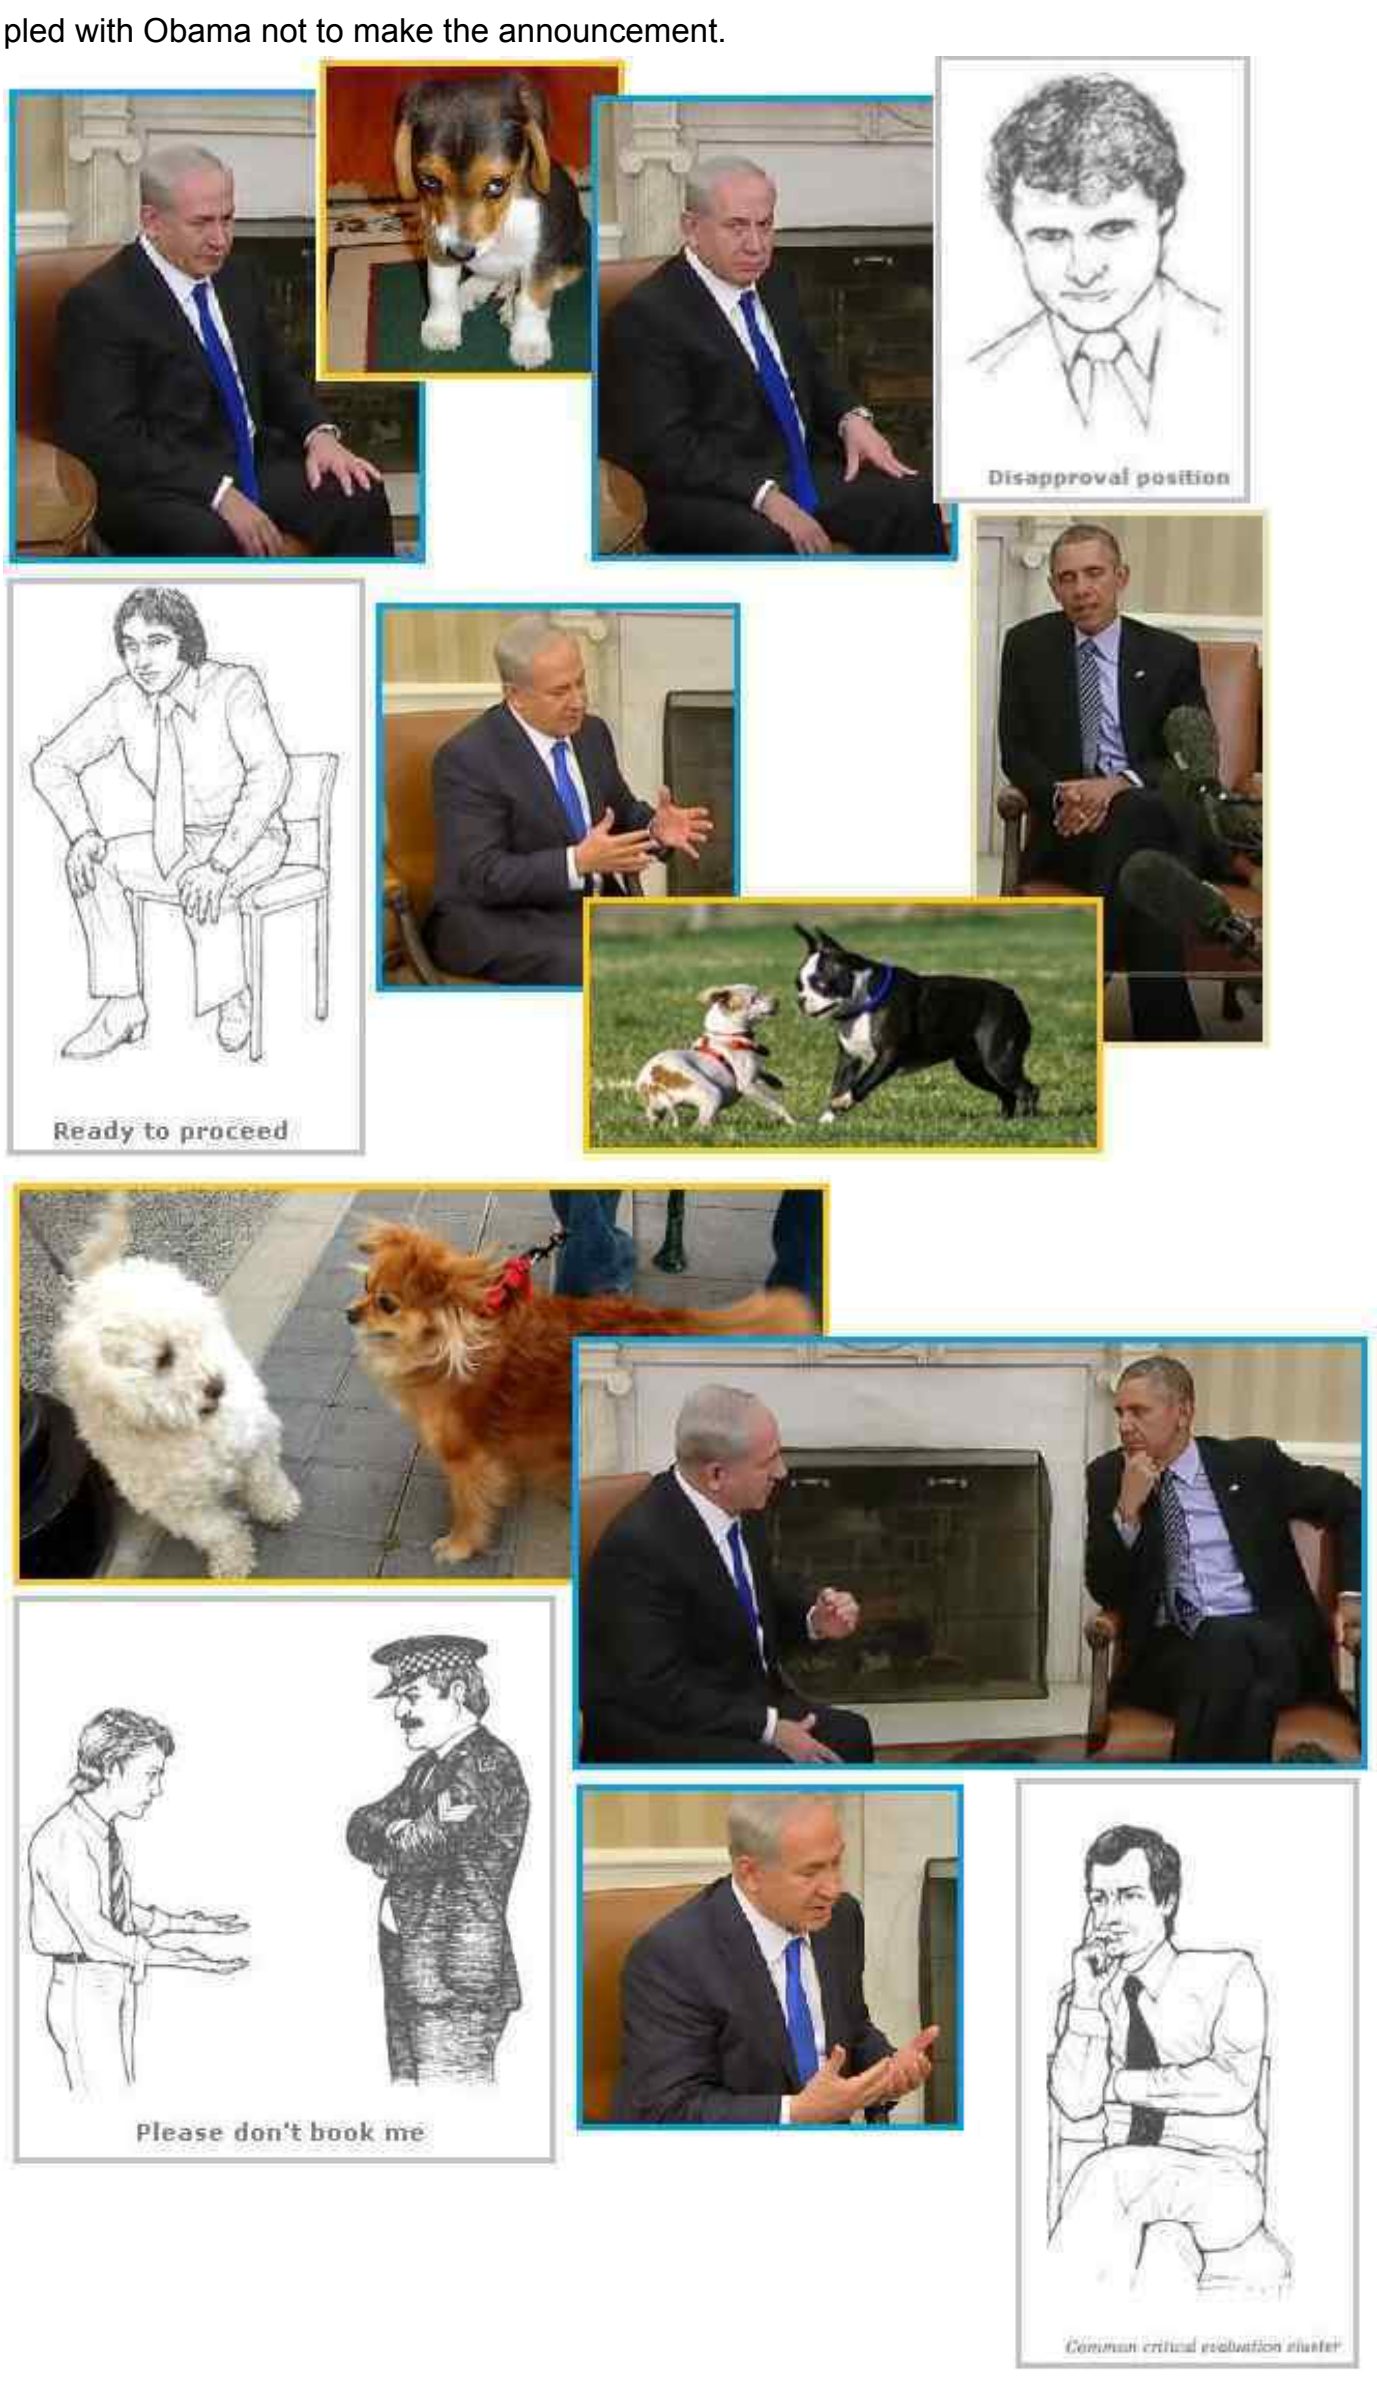
Nibiru Announcement

Periodically the announcement that Nibiru is a real and present danger seems to start up and then dissipate. In 2014 the Zetas mentioned that Israel and the Jewish banking system were the main enemy of the announcement, as bank failures would occur during any panic over a pending Nibiru passage. Bibi pled with Obama not to make the announcement.



ZetaTalk Confirmation **12/6/2014:** *Netanyahu appears to be overreacting, as though he needs to consolidate power before another onslaught. Israel and the banking industry represented by powerful Jews were cited by ourselves as being enemies of the announcement admitting the presence of Nibiru.*

We had Obama's intentions in 2015 but he '*lacked courage*' and backed out. Despite visibility in the skies at the ZetaTalk coordinates, no admission occurred.

ZetaTalk Confirmation **1/24/2015:** *This will inevitably land the public new on this subject at the ZetaTalk website. ZetaTalk became internationally known and famous even before the 2003 arrival of Nibiru right on time and at the location promised by ourselves. ZetaTalk had the ring of truth, was able to predict with accuracy, and was unique in giving people the ability to interact with ourselves via conversations with Nancy. Thus Obama saw this as an opportunity to not only break the cover-up over the pending passage of Nibiru, but to also break the cover-up over the alien presence. Or was it Nancy who provided those coordinates on where to sight the inbound Nibiru?*

In 2016 many articles had appeared speculating that Putin would make the announcement.

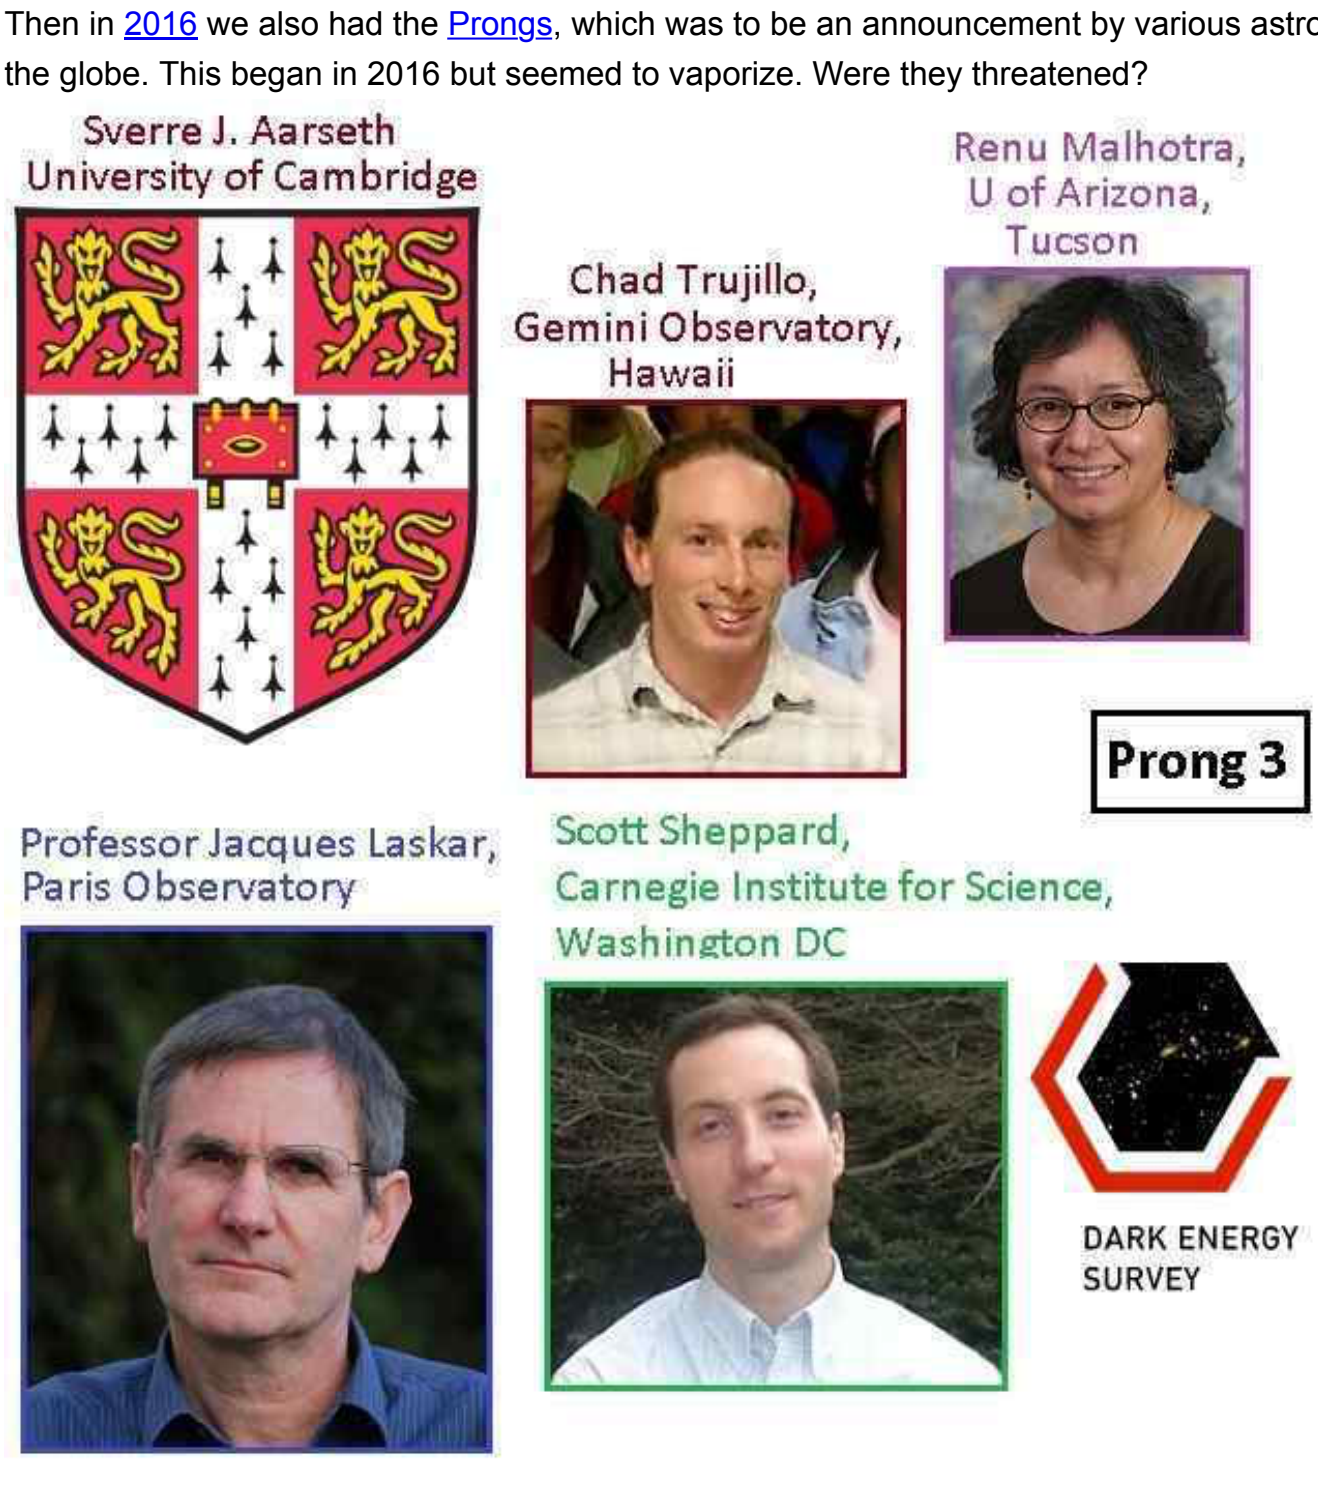
Breaking News: Putin Officially Announces Nibiru Planet X?
February 20, 2017
https://mundomisterioso.net/2017/02/putin-anuncia-oficialmente-nibiru
> *In this video program we will analyze the different videos, news and articles that appear on the internet about Putin and the planet NIBIRU. What is true in all this matter?*

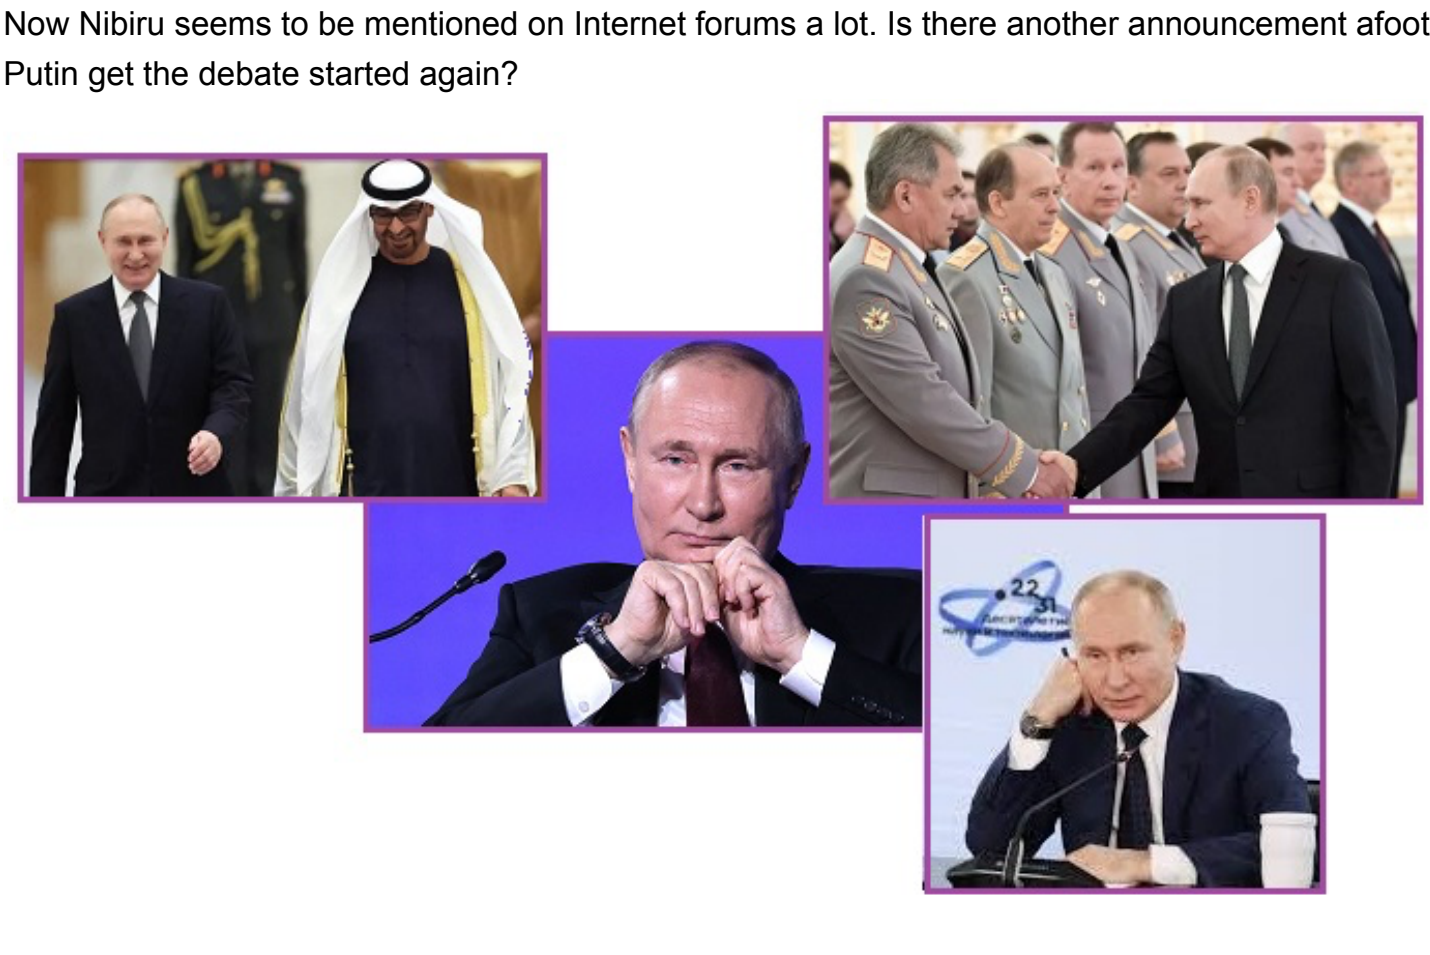
ZetaTalk Confirmation **4/9/2016:** *Since the ZetaTalk saga began 20 years ago, the cover-up over the existence of Nibiru, a habitable traveling planet with an odd orbit, has moved from a denial that planets can roam far from their suns, a denial that a planet such as the mythical Nibiru exists, a claim that other life bearing planets have not yet been discovered, and a denial that intelligent life from elsewhere is visiting the Earth. This gradually moved to admitting the existence of exoplanets seemingly wandering around space unattached to their suns, increasing amateur video on the Internet showing evidence of objects seen near the Sun, the term Nibiru used extensively on the Internet, repeated announcements by NASA et al that evidence of life bearing planets continues to be discovered, and evidence of mass extinctions in the near and far past documented for public consumption.*

Then in 2016 we also had the Prongs, which was to be an announcement by various astronomers around the globe. This began in 2016 but seemed to vaporize. Were they threatened?



ZetaTalk Confirmation **7/31/2018:** *After Obama failed to make an announcement admitting the presence and pending passage of Nibiru, the Prongs emerged. The Prongs were born because Planet 9 had emerged in the news, the excuse for the sky search. The Prongs were designed to be a series of discoveries by astronomers from around the world which would lead to the belated discovery of Nibiru in the inner Solar System, but stalled in early 2017 primarily because of resistance from NASA.*

Now Nibiru seems to be mentioned on Internet forums a lot. Is there another announcement afoot? Will Putin get the debate started again?



Putin to Hold End-of-Year Press Conference on Dec. 14 – Kremlin

> *President Vladimir Putin will hold his annual press conference and field questions from the public on Dec. 14, stoking speculation he will use the event to announce he is seeking another six years in power.*

ZetaTalk Explanation **12/7/2023:** *Will it be Nibiru visibility or a Russian announcement or the mere fact of New Madrid Plate Movements? Any and all could occur but as firm plans are in place, the matter is in the hands of man. Putin has warned the Junta that it will wait no more, and the popularity of Putin supports that. Do we have a date? Of course the New Madrid Rupture would be helpful but not necessary. The Junta is braced for this to occur any day. But since Internet access might have outages, Putin might not wait. Just prior to the Rupture would be ideal, a topic of discussion then on social media or the kitchen table through any outages.*

What has happened since 2014 to empower Putin in an announcement? He is a founding member of the BRICS consortium, a rival to the Jewish Khazarian Mafia that has controlled western media with an iron grip. BRICS is flourishing, while the western banks are going bankrupt. The contract between the US Federal Reserve and these western banks is being dissolved into insolvency, thus removing the National Debt from their coffers. In private talks between Putin and President Trump, the true Commander in Chief in the US, Putin made his intentions clear. No more stalling.

Lake Michigan Triangle

Most people have heard of the Bermuda Triangle, where ships and planes go missing into an interdimensional fog. There is reportedly a Lake Michigan Triangle, and since events have happened in Lake Superior too, a Devil's Triangle that encompassed all the Great Lakes. In the Atlantic the Sargasso Sea reportedly has a region where ships have disappeared, and in the Pacific around the Japanese island of Miyake there is a Dragon's Triangle with a similar history.

> *The Bermuda Triangle, also known as the Devil's Triangle, is a loosely defined region in the western part of the North Atlantic Ocean, where a number of aircraft and ships are said to have disappeared under mysterious circumstances.*

ZetaTalk Bermuda Triangle **7/15/1995**: *The Bermuda Triangle does indeed have unusual qualities, as do other places here and there on Earth. Magnetic anomalies are reported, where compasses swing wildly, clocks stop, and concrete objects fade from sight. What's causing this? These places, fortunately few in number, are an outlet from the center of the Earth for a byproduct of the Earth's compression, a gravity byproduct so to speak. A vent, from where subatomic particles not known to man surge forth periodically, and woe be to the man or fish who finds itself in the way. There are stories of ships and planes disappearing, and it is assumed they were carried off by extraterrestrials, taken off to a far-off zoo, for exhibition. Then why would these only disappear from such sites, and not regularly around the globe?*

Here and there around the face of the Earth are similar outlets for this byproduct of the Earth's compression, many of them well known due to the havoc shippers or travelers experience - an area off the coast of Japan, and in one of the Great Lakes, for example. Such outlets also occur where man is unaware of them, as in the depths of the oceans or within inaccessible mountain crevices. What determines the outlet is not only the surface structure of the rock, fractures in fact, but also the structure of the underlying rock, factors man cannot measure.

The Bermuda Triangle and other spots where dimensional shifting occurs are a natural occurrence, but our visitors from other worlds use density shifting to teleport. There are dangers in Density shifting, as reports of the Philadelphia Experiment done by the US Navy in 1943 attest. The movie *The Fly* also depicts the dangers of density shifting in the hands of ambitious humans wanting this teleporting tool. Mankind does not have the knowledge or skill for this.

http://www.history.navy.mil/faqs/faq21-2.htm
> *The genesis of the Philadelphia Experiment myth dates back to 1955 with the publication of The Case for UFO's by the late Morris K. Jessup. Some time after the publication of the book, Jessup received correspondence from a Carlos Miquel Allende, who gave his address as R.D. #1, Box 223, New Kensington, Pa. In his correspondence, Allende commented on Jessup's book and gave details of an alleged secret naval experiment conducted by the Navy in Philadelphia in 1943. During the experiment, according to Allende, a ship was rendered invisible and teleported to and from Norfolk in a few minutes, with some terrible after-effects for crew members.*

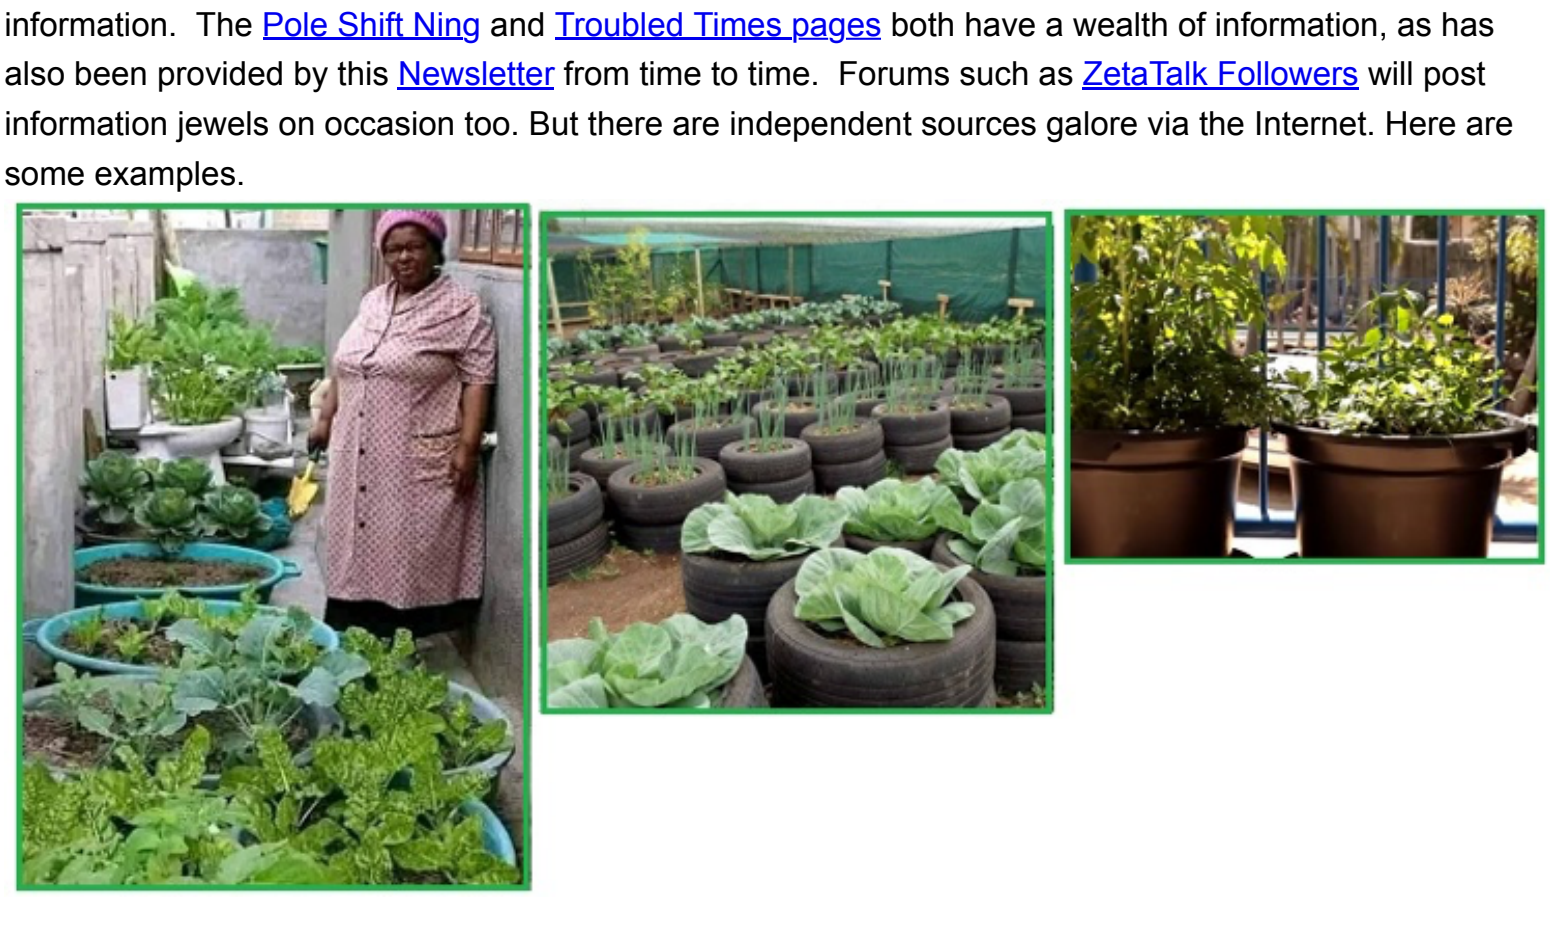
> *Seth takes Veronica back to the warehouse that serves him as both home and laboratory, and shows her a project that will change the world: a set of "Telepods" that allows instantaneous teleportation of an object from one pod to another. Seth takes Veronica back to the warehouse that serves him as both home and laboratory, and shows her a project that will change the world: a set of "Telepods" that allows instantaneous teleportation of an object from one pod to another. Although the Telepods can transport inanimate objects, they do not work properly on living things, as is demonstrated when a live baboon is turned inside-out during an experiment.*

ZetaTalk Density Shift **8/15/1996:** *Density shifting occurs in nature, and on some worlds or under certain circumstances occurs frequently. Your world, Earth, experiences this only intermittently at breaks in the Earth's crust where byproducts of the compression in the Earth's core escape. These places on occasion find themselves in a flood of these byproducts, and temporary shifting occurs. Deliberate density shifting is an adaptation of what occurs naturally. Rather than a complicated affair, it is remarkably simple. The complexity lies not in effecting the shift, but in managing the perimeter.*

ZetaTalk Warning **9/15/1995:** *What are the dangers? First and foremost there is a danger of not making a complete transition, of being partly left behind. This can happen when the coordinates are not set properly, a matter we attend to with the utmost care. These coordinates are essentially boundaries, but boundaries are defined as more than the periphery. Boundaries include chemical composition, molecular structure, and connectedness. The true stories about the Philadelphia Experiment and the fictional movie The Fly are not far from the horror that can happen when the necessary knowledge or proper care are not in place. We take care not to touch one another or our contactees during the shift. We take care to include all parts of the object to be moved within the boundaries.*

Self Sufficiency Sources

The Internet holds a wealth of information on Self-Sufficiency. There is no central site for this excellent information. The Pole Shift Ning and Troubled Times pages both have a wealth of information, as has also been provided by this Newsletter from time to time. Forums such as ZetaTalk Followers will post information jewels on occasion too. But there are independent sources galore via the Internet. Here are some examples.



How to Save Space and Money by Growing Cabbage in Containers

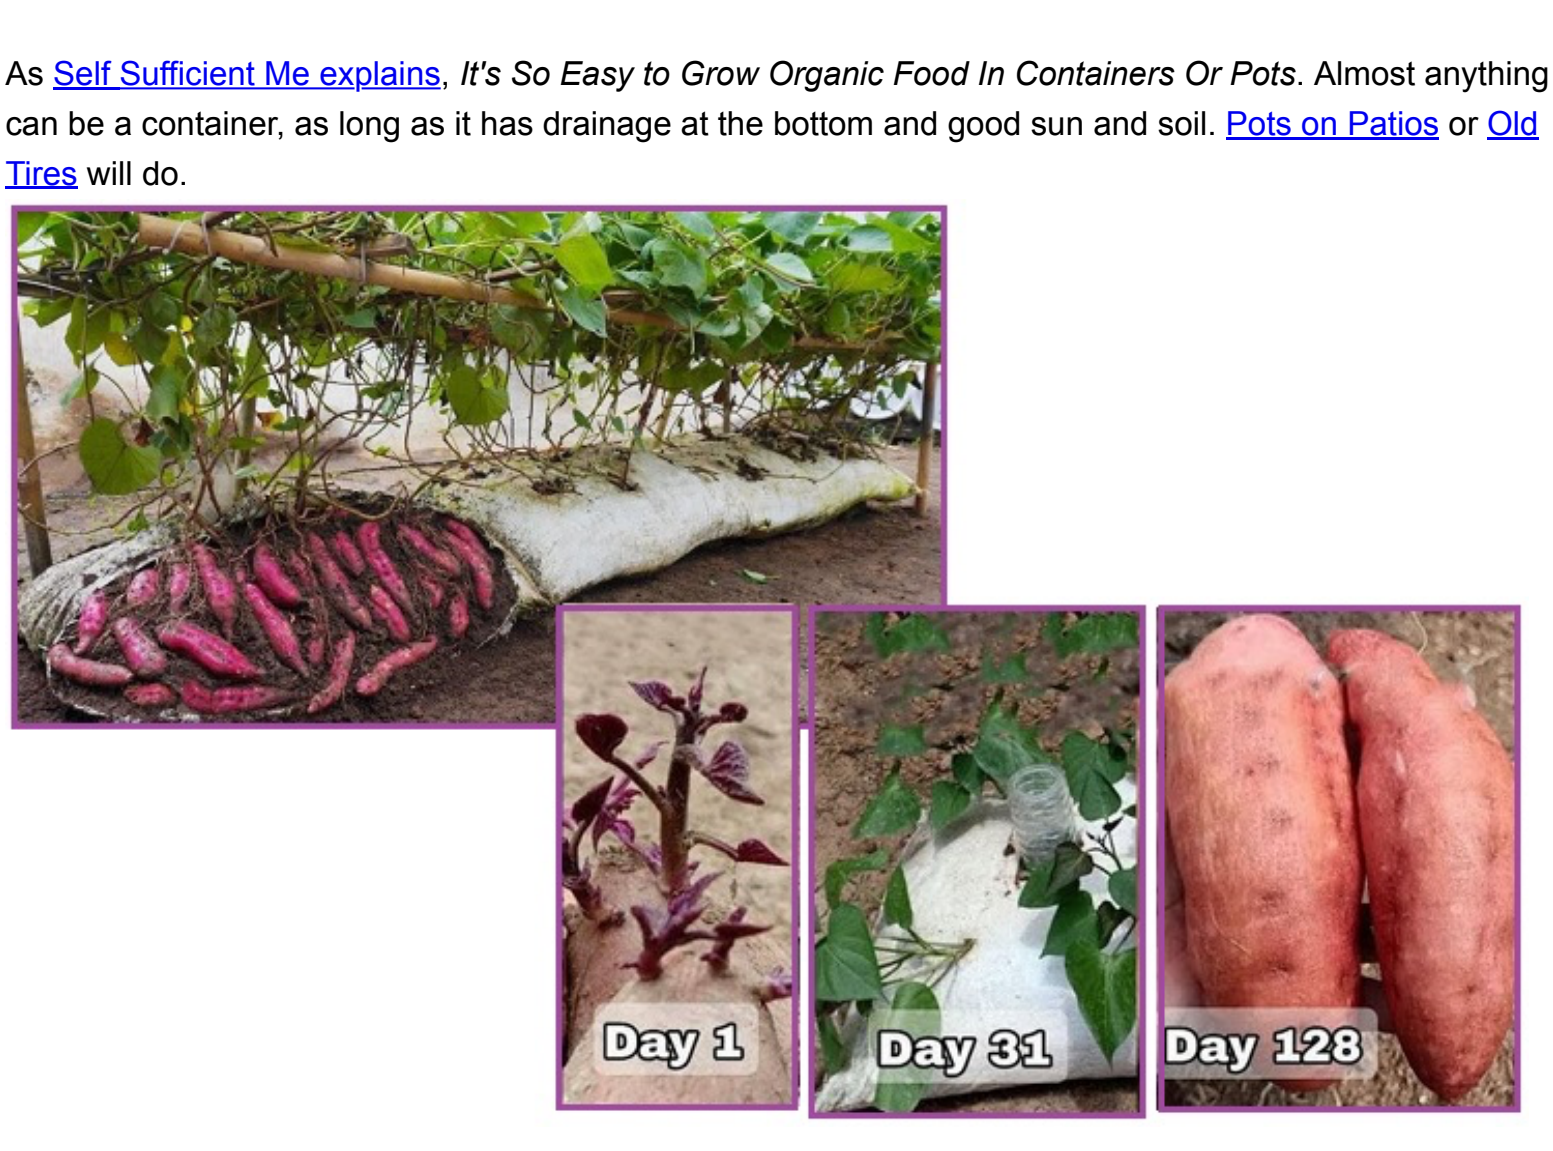
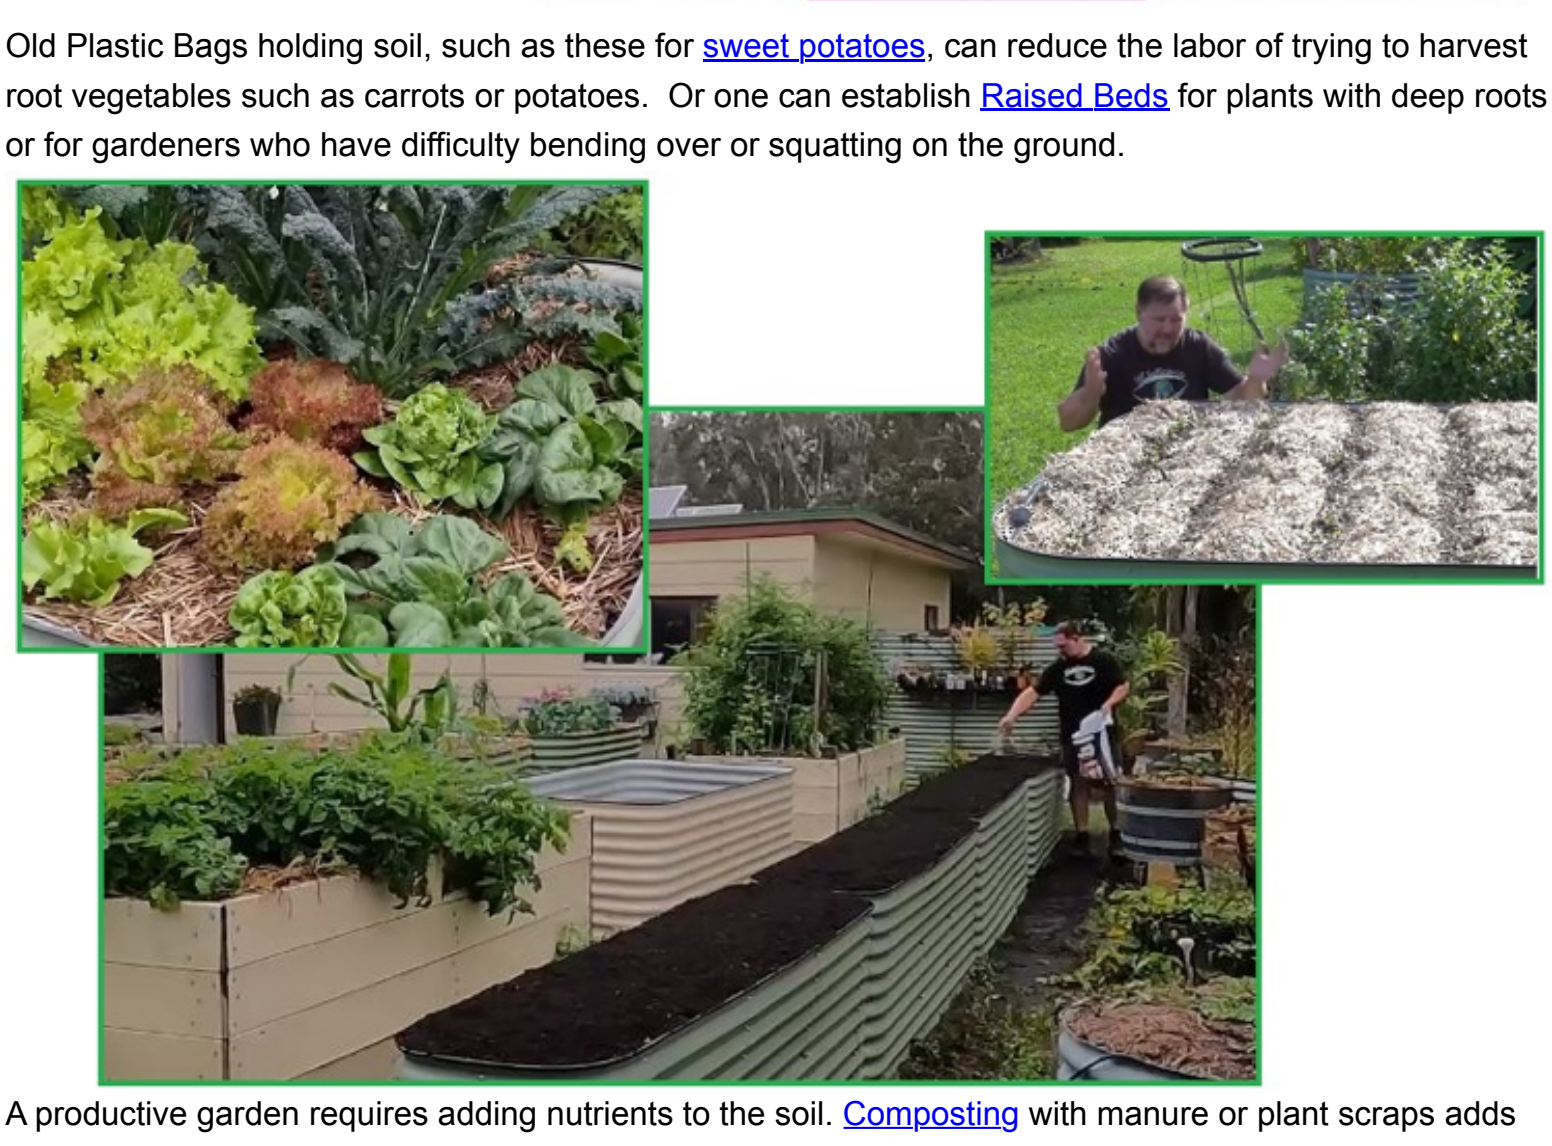
https://1millionideas.com/how-to-save-space-and-money-by-growing-cabbage
> *Growing cabbage in containers is a space-savvy gardening solution and is perfectly suitable for those with limited garden space or challenging soil conditions.*

As Self Sufficient Me explains, *It's So Easy to Grow Organic Food In Containers Or Pots*. Almost anything can be a container, as long as it has drainage at the bottom and good sun and soil. Pots on Patios or Old Tires will do.



Old Plastic Bags holding soil, such as these for sweet potatoes, can reduce the labor of trying to harvest root vegetables such as carrots or potatoes. Or one can establish Raised Beds for plants with deep roots or for gardeners who have difficulty bending over or squatting on the ground.



A productive garden requires adding nutrients to the soil. Composting with manure or plant scraps adds nutrients and encourages earthworms to grow. Earthworms add nitrogen to the soil, and the egg casts they produce are considered primo fertilizer. Animal byproducts such as grease should be avoided in a compost pile as it is counter-productive for the earthworm population. If too many egg casts lay about this acts as a contraceptive for the worm population. A population explosion is in process. Pluck them out instead and use directly as fertilizer on crops.

TOPIC: Vital Earth

Earthworms are an excellent source of protein, reportedly 82% protein. As noted in a recent Comic Strip by Judd Winick, for many this might require an attitude adjustment. Worms have always been only one step away in the human Food Chain via birds and fish and in the case of Australian Aborigines, New Zealand Maoris, and some areas of China they are a direct food source. The essential oil of Earthworms is Omega 3. Earthworms can be given a Water Purge, but Cleaning and Rinsing are necessary. Earthworm Powder can be a handy food additive, and many Recipes exist for the cleansed meat. Earthworms are Easy to Grow, per Mother Earth articles, and don't suffer from fungus, bacterial, or viral infections. They Multiply Rapidly, are Efficient, but production is assisted by proper Feeding, and Harvesting techniques, and Tips. Avoid these Missteps. Growing earthworms and Composting for soil are synergistic, but avoid the High Heat that a compost pile can generate. Earthworms can be called up by a process known as Grunting. Vital Earth provides and delivers a complete system that includes

- a growing system
- a safe long-distance delivery system
- an end use application system for organic fertilizer production
